Dangerous Elite > General Discussions > Thrustmaster HOTAS Warthog Theme Details: "How ^ you handle Elite? Find the most potentially dangerous commands configured with Modifier keys, along with lower-priority tasks that are not used as often. Delta Defensive ^: An advanced combat withdrawal tactic that will retract your hard points, set PIPs defensively and try to Supercruise/High Wake out. It works in both stations and planetary locations. (Optional configurations are also available for a two-level PIP system and also by default A one-level PIP system configurable in preferences) Auto-Docking Request Procedure Auto-Repair/Refuel/Restock Ship ^ Hangar Automation' for Stations, Settlements and Fleet Transport. Thank you. 2. Download & Extract the latest zip file package. Ex. [1] Next Target. Fire Repeater (self-fire) on the primary and secondary fire buttons. It can be run from the TARGET GUI later. This function ^ allows multiple allocations for a single botA ^ n, different layers, which also offers some protection ^ accidental pressures. Although all script files must be in the same folder. So, for anyone who has a Warthog, how well does it work with Elite, and what are their opinions that she actually used one? Everything is mapped! Virtually everything you can configure in Elite Dangerous Controls has been added to the Warthog, in addition to the hidden shortcuts to control your FPS screens and bandwidth and to hide the GUI of your ship. Check " Exclusive " in TrackIR to automatically load if desired. The Warthog Script can be run from anywhere. This combination ^ represented in the reference map images by prefixing the name of the command. Automatically fires a heat sink when entering Silent Running (you can also fire separately). Recently Thrustmaster lowered the price of the Warthog HOTAS in Australia, and with little steering competition and a flying raft to play, I'm seriously considering buying one. The only thing that holds me is the design of Warthog. design.
